Dear Users: Thank you for purchasing our products!

Follow these steps to configure

APP Installation

- 1 Search for Tuya Smart app or Smart Life app in the application market, or scan the QR code as below, and choose to install them.

download QR code

- 2 Open the app after installation is complete then log in by your phone number.

Add ROMA Wifi control board

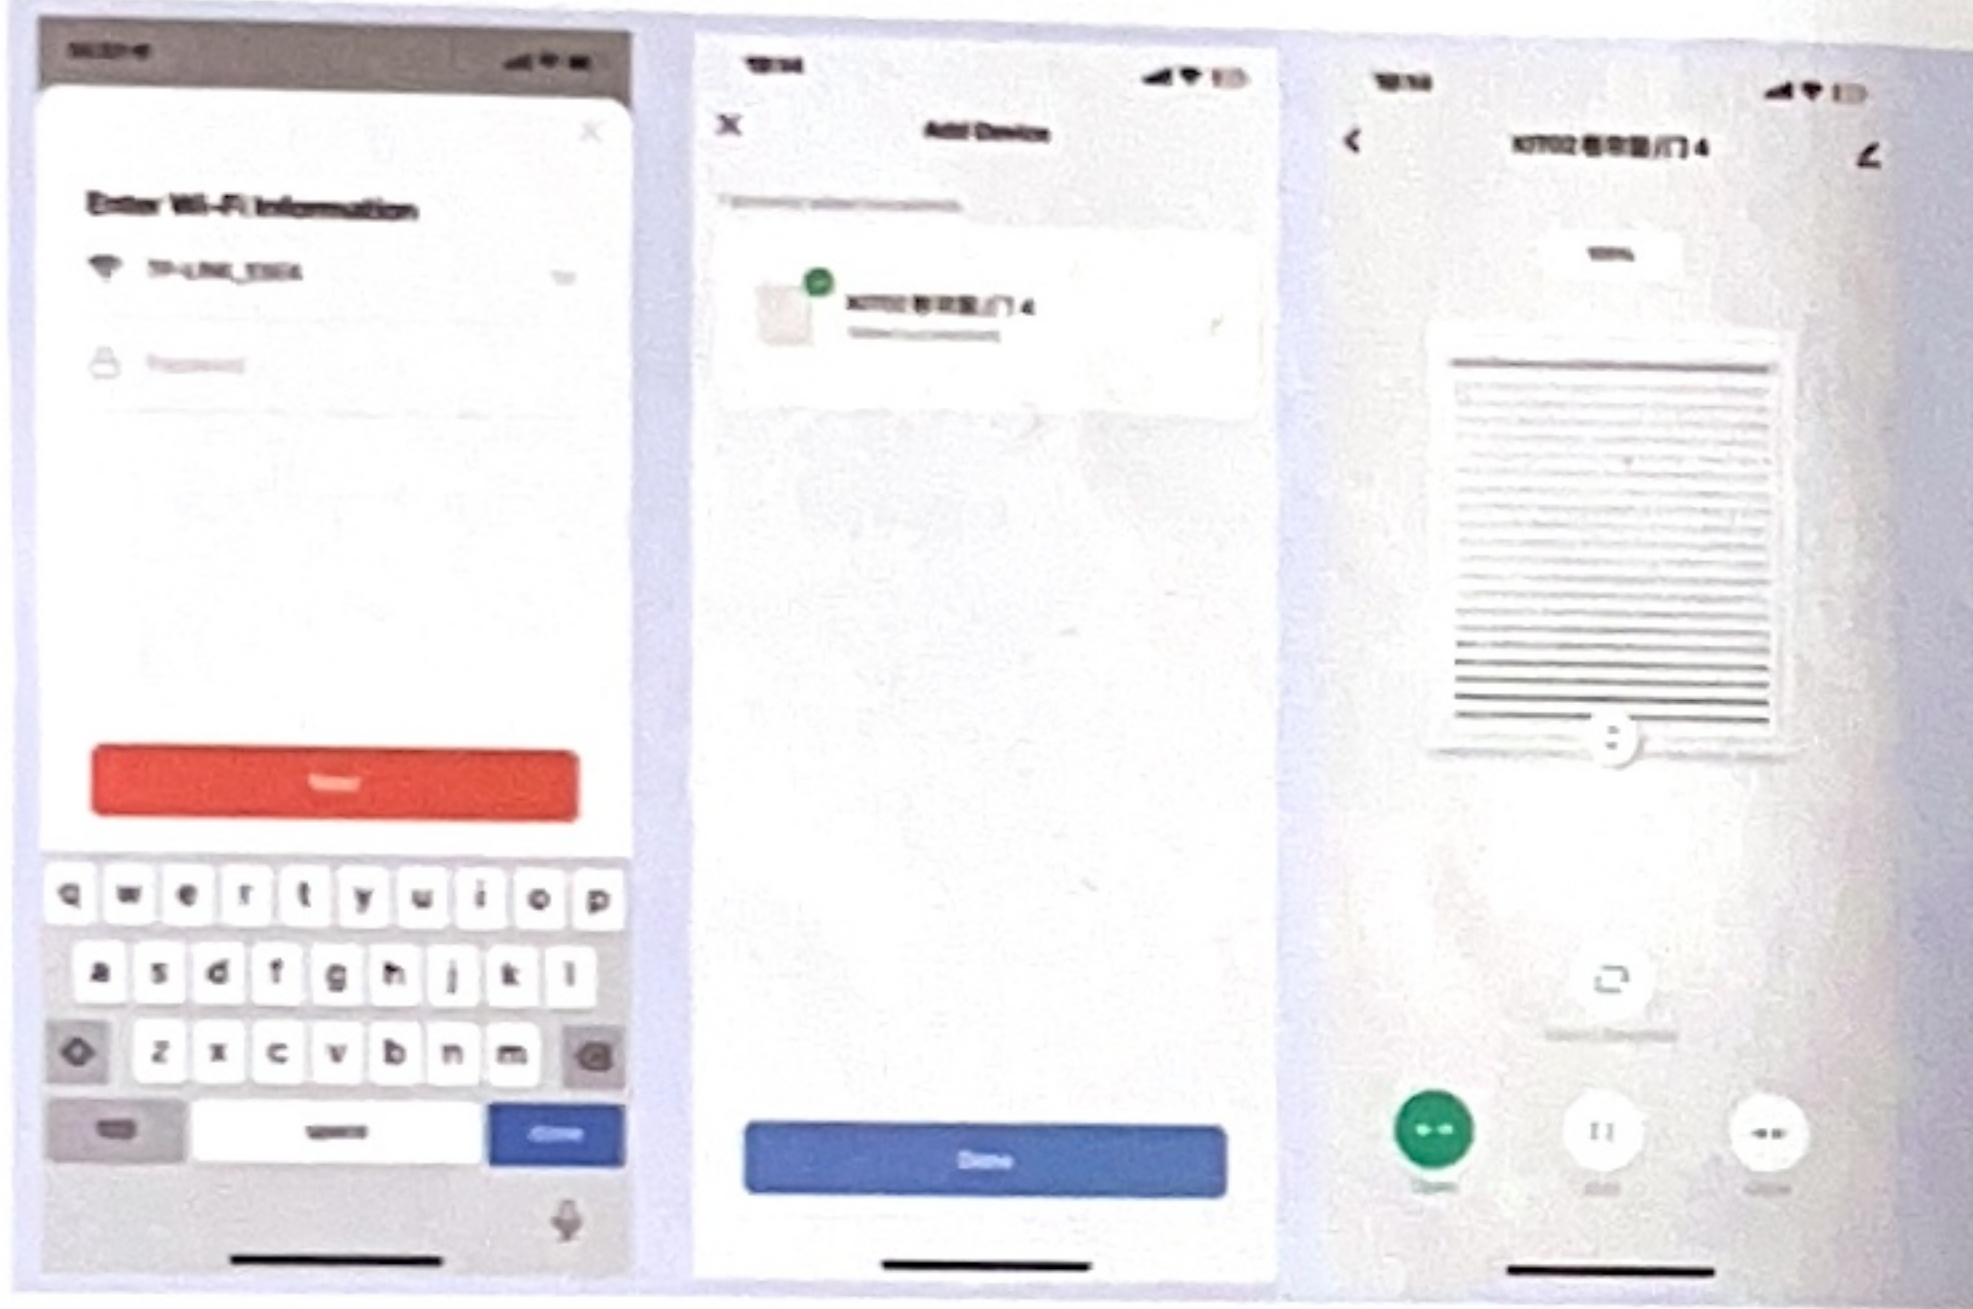

• Add Device

- (1) When the roma control board is powered on, the blue wifi LED remains on which means entering standby mode.
- (2) Enter the Tuya APP and click "Add Device" on the Home screen. Press the set button on the remote control for about 5 seconds, and the wifi LED will start flashing, entering the distribution network state.
- (3) The app automatically searches for new device, discover them, and click "Add Device".

Add WiFi Remote Control

- (4) Enter the WiFi password and click Next. The device has been successfully added. Click "Finish".

Device Unbind

Method 1:

- 1) Select the icon in the upper right corner of the device, select "Remove Device" at the bottom, Disconnect, and Confirm.
- 2) The blue light on the remote control remains on and then starts flashing. After 3 minutes of no operation, the indicator light remains on and enters standby mode.

Note: Within 3 minutes of flashing, you can directly re-enter the distribution network state.

Device Share

- 1) Select the icon in the upper right corner of the device, select "Share Device", and share the link.
- 2) The recipient of the sharing, click on the sharing link, and follow the prompts. Enter the app and confirm receiving the shared device.
- 3) After receiving, the shared device I received appears on all devices. Entering the device allows control of the device.

Note: If multiple people want to control the device, it can be shared through the device.
